

National Public Event

Dissemination of the achievements of the project

On May 18, 2022 the Ministry of Infrastructure and Energy, organized the “National Communication Event” for the Inter-Connect Plus project.

The focus of this event was to present the achievements of the project and to discuss the Impact of COVID-19 breakout in the intermodal passenger transport.

The meeting was organized in hybrid form, with physical presence and online participation. During this event all target groups were reached because there was physical presence and online presence.

The host partner of the event was the Directory of IPA Project in the Ministry of Infrastructure and Energy, responsible for the implementation of the Project.

The stakeholders who attended the meeting were representatives of MIE, the representatives from CERTH, representatives from the Albanian Railway, representatives from the Albanian Institute of Transport, the external expert contracted by MIE under this project etc.

MIE introduce the Interconnect Plus project in order that all participant and stakeholders to get to know the project in deep, its objectives and expectations.

Presentations of the study realized from the external expert contracted by MIE under this project, “The Impact and considerations regarding international passenger transport after Covid -19 in Albania” was done during the event.

The Lead Partner (CERTH) presented during the meeting their study on “The Impact and considerations regarding international passenger transport after Covid -19 in Greece”. Also, presentation from the representative from Albanian Institute of Transport were performed.

The event was concluded with discussion and exchange of ideas from the participants.
